

## Regional Outfall System renewal

We're replacing a 600m section of our Regional Outfall System (ROS) pipeline.

The ROS is one of our most critical assets, conveying on average around 35 ML of treated wastewater daily from the Gippsland Water Factory to our outfall at Dutson Downs.

We've already replaced 550m between Tyers Road and Cross's Road. We're now ready to replace the final section that runs underground on Cross's Road.

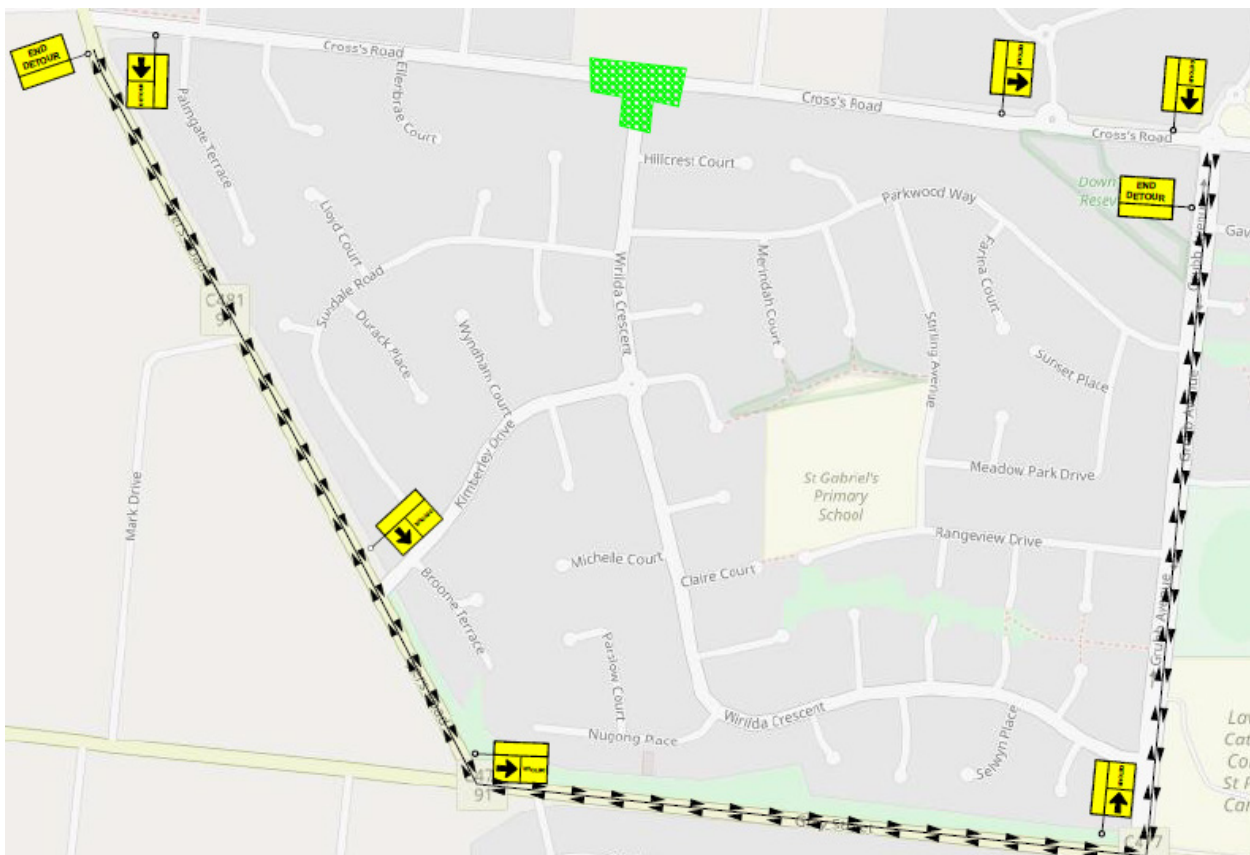

### What does this mean?

We'll need to close Cross's Road between Tyers Road and Grubb Avenue for around two weeks.

There'll be detours and traffic management in place.

Keep an eye on message boards in the area for dates and times.
